EMTrack™ Release Notes

These notes describe highlights of the EMTrack 4.2 release that is scheduled for Wednesday, March 20, 2019. Additional details about these and other features are available through your solution. For more information, please contact your Client Success Manager (CSM) or Juvare Support at 877-771-0911 or support@juvare.com.

Real-time Patient Statuses for EMS

Access to real-time EMS transport updates offers valuable insight for emergency medical services (EMS) providers. High-level patient information, including the **Triage Category**, **ETA**, **Alert Type**, **Status**, **Gender**, **Age**, **Destination**, **EMS Agency**, and **EMS Unit**, is summarized on the *Transports* tab to equip providers with the details they need to better manage their EMS services.

Triage Category	ETA	Alert Type	Status	Gender	Age	Destination	EMS Agency	EMS Unit
🟥 Red	04:46 (6 min)	STEMI	Acknowledged	Male	40 - 59 YR	(M) Gulf Coast Hospital	Central City EMS	HEMS 3
⬜ Unknown	04:47 (7 min)	STEMI	New	Male	40 - 59 YR	(M) DeSoto Memorial Hospital	Central City EMS	Medic 6
🟩 Green	04:53 (13 min)	-	Acknowledged	-	-	(M) Lee Memorial Hospital	Central City EMS	Medic 5
🟨 Yellow	04:59 (19 min)	Stroke	New	Female	60+ YR	(M) Cape Coral Hosp	Central City EMS	Medic 13

🟨 Yellow	05:14 (35 min)	-	New	-	-	(M) DeSoto Memorial Hospital	Central City EMS	Medic 2
🟨 Yellow	05:17 (37 min)	-	New	-	-	(M) Gulf Coast Hospital	Central City EMS	Medic 3
🟥 Red	-	Trauma	Received	Male	20 - 39 YR	(M) Gulf Coast Hospital	Central City EMS	ALS 3

Audible Incoming Patient Alerts

Hospital personnel can choose to receive audible alerts that notify them about incoming patients. The alert is toggled on or off through *Patient Notification Settings*, by clicking **Enable Advanced IPN alerts**.

Swift Retrieval of Patient Data

On patient intake forms, entering the identification number for a previously-entered patient automatically populates form fields with the patient's details. Enabling EMS to swiftly enter, retrieve, and update patient information through mobile devices reduces redundancy and expands visibility into patient records.

Streamlined Username Requirements

Removing case-sensitive username requirements during log in streamlines access to EMTrack.

Quick Access to EMTrack Lite for Windows

Allowing administrators to download EMTrack Lite from *System Settings* in the web solution and immediately install it on Windows devices facilitates access across platforms.
