

PRODUCT ANNOUNCEMENT

WebEOC[®] IPAWS Messaging

Version 3.2

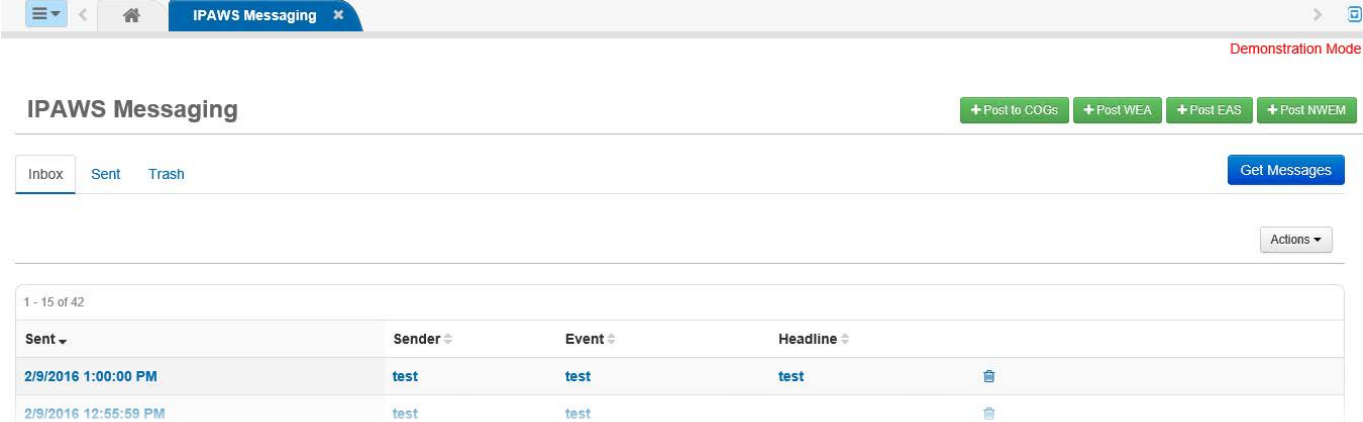

This document highlights important release changes to your system. If you have questions about changes not covered in this document, contact your Client Services Manager.

Note: IPAWS Messaging version 3.2 requires WebEOC 8.0 or later.

Redesigned IPAWS Messaging Plugin

The *IPAWS Messaging* plugin has a new look and feel, its design and navigation now mirroring WebEOC 8.0's new user interface. Although the functionality of *IPAWS Messaging 3.2* is similar to previous versions, the new design changes the presentation of the overall solution.

This re-imaging is sure to enhance your experience with the plugin and make it even easier to post, view, and manage your critical messages in a timely, efficient manner.

The screenshot displays the IPAWS Messaging plugin interface. At the top, there is a navigation bar with a hamburger menu, a home icon, and the title "IPAWS Messaging". Below the navigation bar, there are four green buttons: "+ Post to COGs", "+ Post WEA", "+ Post EAS", and "+ Post NWEM". A "Demonstration Mode" indicator is visible in the top right corner. Below the buttons, there are tabs for "Inbox", "Sent", and "Trash", with "Inbox" selected. A "Get Messages" button is located to the right of the tabs. An "Actions" dropdown menu is also present. The main content area shows a list of messages with columns for "Sent", "Sender", "Event", and "Headline".

Sent	Sender	Event	Headline
