

Ad-Hoc Notifications Plug-In 1.17.0 Release Notes

These notes describe enhancements introduced in the Ad-Hoc Notifications Plug-In 1.17.0 release for eICS that is scheduled for Wednesday, April 28, 2021. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

Email Attachments

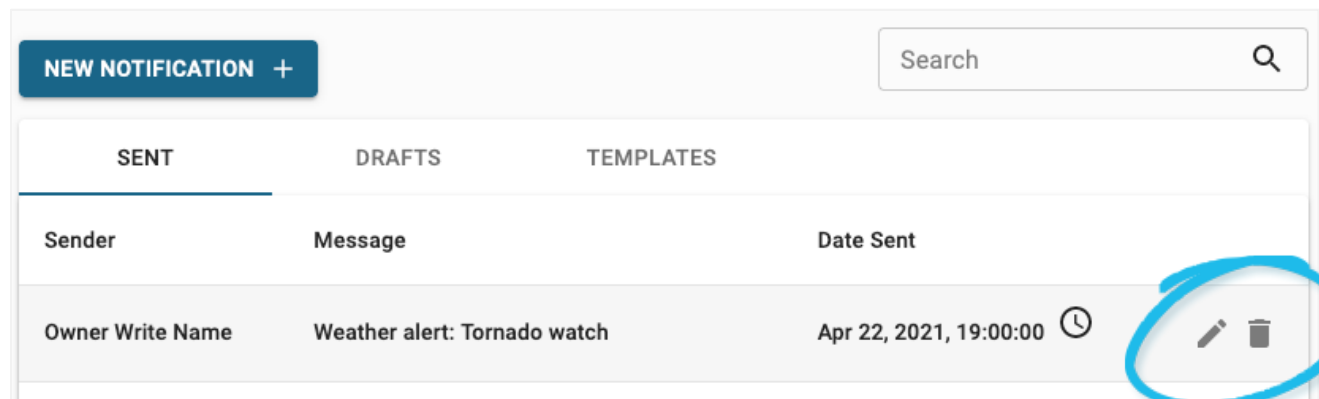

Now, in addition to the email message, you can send attachments. Attaching important documents, such as plans and maps, allows you to increase the information provided to recipients. Email attachments are limited to 10 files with a combined size of 10 MB.

The screenshot shows the 'Delivery Methods *' section with three options: EMAIL (selected), TEXT, and VOICE. Below is the 'Email Body *' section with a rich text editor. The text in the editor reads: 'Important notice! A traffic accident is currently blocking major roadways and intersections around the facility. Please find a **map** of the blocked roads and recommended rerouting [attached to this notification](#).' Below the text, a PDF attachment named 'Reroute map.pdf' is visible. A blue arrow points to the attachment.

Cancel Scheduled Notifications

When necessary, you can cancel scheduled notifications. Notifications that are scheduled to be sent later can now be reverted to draft format for editing or simply deleted.

The screenshot shows a notification management interface with a 'NEW NOTIFICATION +' button and a search bar. Below is a table with columns for 'SENT', 'DRAFTS', and 'TEMPLATES'. The table has three columns: 'Sender', 'Message', and 'Date Sent'. A row is shown with 'Owner Write Name' as the sender, 'Weather alert: Tornado watch' as the message, and 'Apr 22, 2021, 19:00:00' as the date sent. To the right of the date is a clock icon. A blue circle highlights the edit and delete icons (a pencil and a trash can) at the end of the row.

| SENT | DRAFTS | TEMPLATES |
|------------------|------------------------------|--|
| Sender | Message | Date Sent |
| Owner Write Name | Weather alert: Tornado watch | Apr 22, 2021, 19:00:00  |

Enhancements

Various usability and performance enhancements were enacted.
