

## eICS™ 4.5.1 Release Notes

These notes describe highlights of the eICS 4.5.1 release scheduled for Thursday, July 30, 2020. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or [support@juvare.com](mailto:support@juvare.com).

### Event Log

Enhanced the capabilities associated with the Event Log tab on the Incident Dashboard, improving overall solution performance.

### Resource Requests to Juvare Exchange

Added the ability to send Resource Requests to Juvare Exchange. This new integration capability allows you to send Resource Requests to boards in WebEOC, combining multiple sources of data to present a more comprehensive picture of crucial operations.

### Websites on the Incident Dashboard

Resolved an issue affecting the way websites are displayed and accessed through various tabs, such as News and Weather, on the Incident Dashboard. Websites no longer open in a tab in the solution but in a new external browser tab.
