

PRODUCT ANNOUNCEMENT

Electronic ICS[®]

Web Version 3.0

This document highlights important release changes to your system. If you have questions about changes not covered in this document, please contact your Client Services Manager. Further information can be found in the Online Help.

General

New User Interface

Intermedix is pleased to provide you with a glimpse into the new eICS user interface currently under development. The *Library* portion of the *Planning* area has been updated to the new interface, and we are making these pages available to you in Web 3.0 so you can get a feel for where features appear and how they work. We also encourage you to provide feedback.

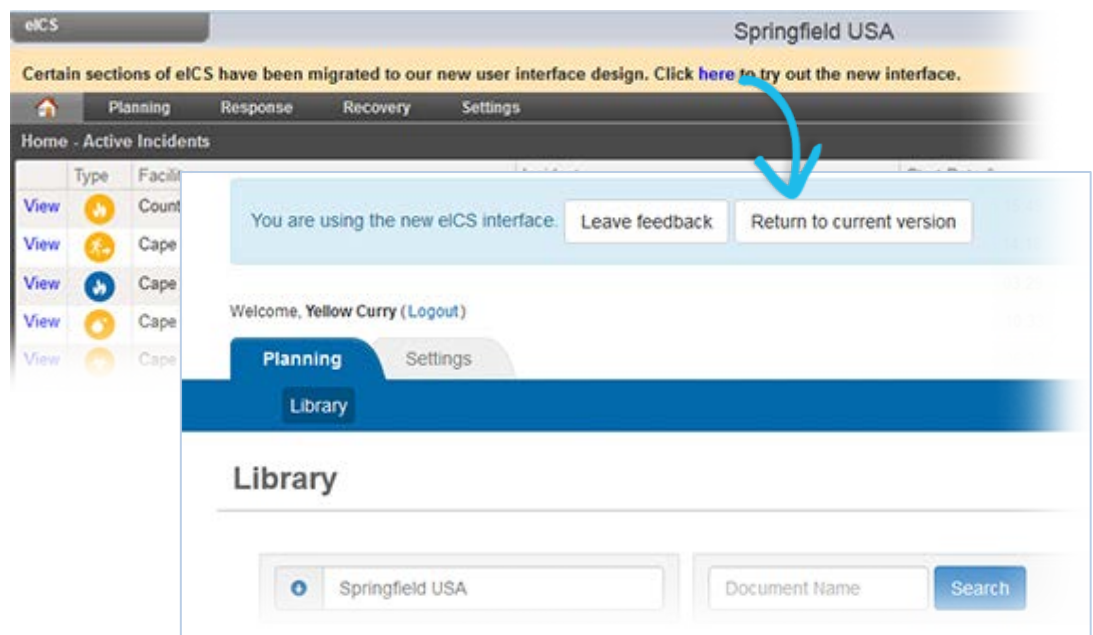

These pages and features are available both in the existing user interface and the new one. The changes you make in either interface are retained.

Access

At the top of the existing eICS page you now see a message bar with a link to the pages that have been migrated to the new interface design.

Click the **here** link to view these pages.

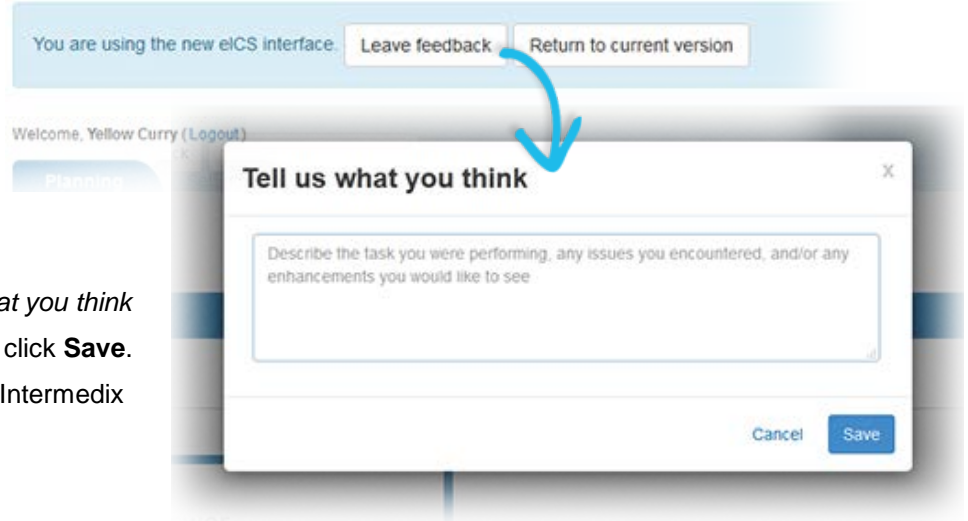

Release 3.0 includes a subset of the tabs that are normally available to you.

Message and Feedback

The top of the new interface page notifies you that you are now looking at the new user interface. This area also allows you to return to the current eICS version.

To encourage you to provide feedback about the interface, we made it very easy to submit comments. Simply click the **Leave feedback** option. In the *Tell us what you think* window, enter your comments and click **Save**. The information is delivered to the Intermedix eICS team.

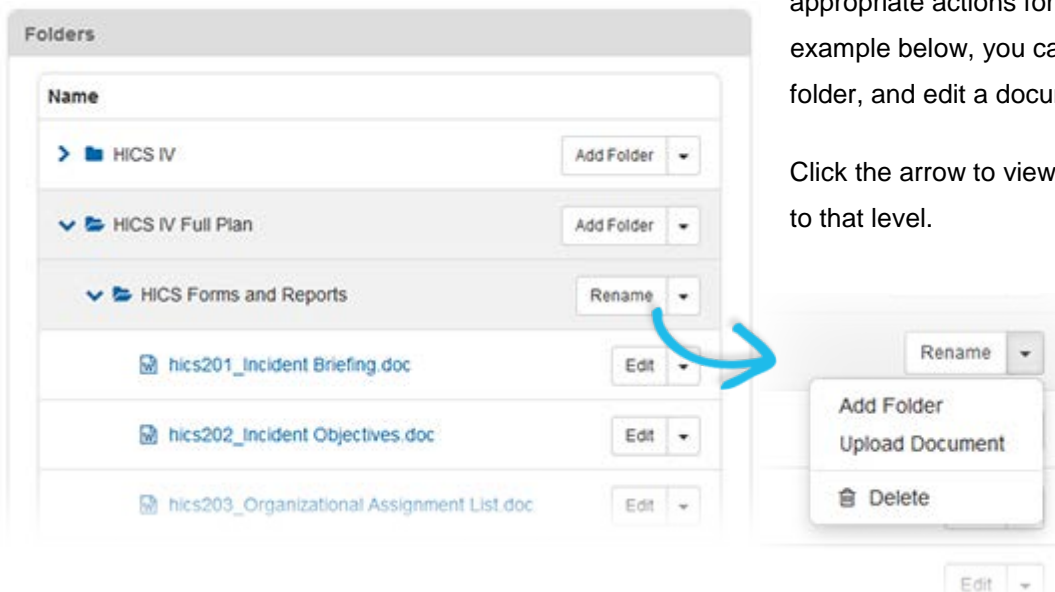

Library Features

You can perform numerous tasks in the library using this new interface including:

- Viewing, renaming, and uploading files.
- Searching the library.
- Adding, renaming, and deleting folders.
- Checking documents in and out.
- Copying and/or moving documents between libraries (Manage Documents feature).

Action Menu

In some cases, an action menu appears on the right side of each row in a table. This drop-down menu contains appropriate actions for that item. As shown in the example below, you can add a folder, rename a folder, and edit a document.

Click the arrow to view other options appropriate to that level.

Settings

From the *Settings* top-level tab, you can access and manage your **Security Question**.

The screenshot shows the 'Security Question and Answer' form within the 'Settings' tab. The form includes a title, a brief instruction, and three input fields: a dropdown menu for the question, a text box for the answer, and a text box for the email address. A 'Save' button is located below the email address field. The eICS logo and 'Powered By' information are visible at the bottom of the form.

Security Question and Answer
Set up a question and answer to help verify your identity should you forget your password.

*Question: What are the last 4 digits of your driver license?
*Answer: 12
*Email Address: ycurry@mailinator.com

Enhanced Event Information

You can now quickly view details about notification entries that appear in the incident dashboard's *Event Log* tab. When you point to the notification, a pop-up window opens showing the candidate's **Availability** and **Location**. In this example, the candidate has not yet responded to the availability request.

In addition, if a voice notification was sent to the candidate, this window shows its status.

Time	Response	Notification	Candidate	Details
11 Dec 2015 15:49	Notification	Aqua Azul Aqua	Aqua Azul Aqua	• Voice Notification: Requesting Availability
11 Dec 2015 15:52	Notification	Aqua Azul Aqua	Aqua Azul Aqua	• Availability: No Response
11 Dec 2015 15:55	Notification	Aqua Azul Aqua	Aqua Azul Aqua	• Location: Unknown

Browser Support

Currently, eICS office integration is not compatible with the Microsoft Windows® 10 default browser, Edge®. For those using Windows 10, Intermedix recommends using Internet Explorer® 11 as your browser.
