

EMResource® Release Notes

These notes describe highlights of the EMResource 3.54 release scheduled for Wednesday, January 20, 2021. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

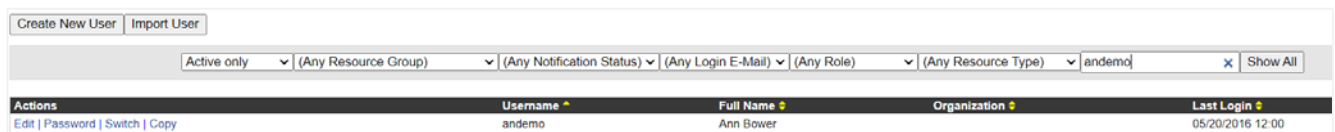

Juvare Login Services

Juvare Login Services is an account management feature being rolled out across Juvare solutions. This new feature includes state-of-the-art technology that improves the security of your account, while at the same time providing easy access to reset your password in case you forget it.

For more information, please see the attached [Administrator](#) and [User](#) Frequently Asked Questions (FAQs) documents.

Create New Accounts by Copying a User

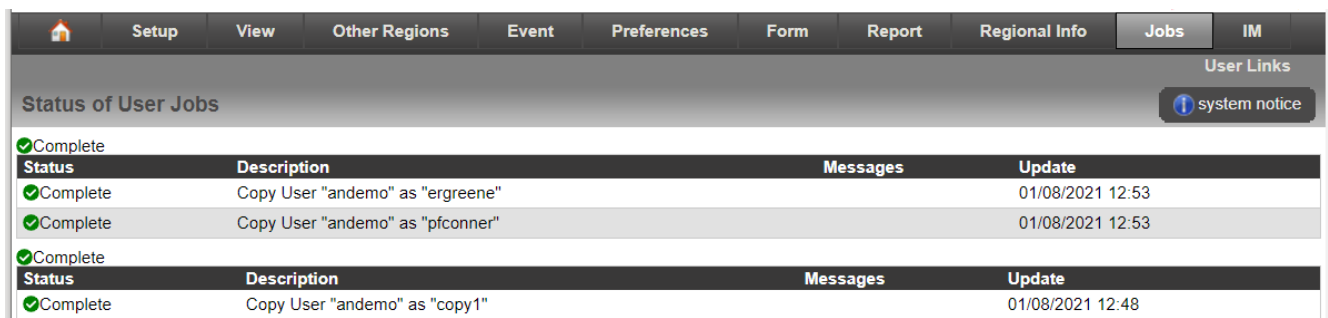

Introduced the option to quickly create new accounts by copying a user account. Using the copy account feature and adding a name and login email means resource rights, roles, advanced rights, notification preferences, form security, event template security, views, and multi-region event rights are automatically copied to the new account.

Actions	Username	Full Name	Organization	Last Login
Edit Password Switch Copy	andemo	Ann Bower		05/20/2016 12:00

This feature is especially helpful for administrators that want to separate previously shared accounts into two or more accounts. In fact, you can create multiple new accounts at the same time.

While the copy account feature is processing, you can navigate away to complete other work. At any time, you can go to the new Jobs tab to monitor the status of new accounts.

Status	Description	Messages	Update
Complete	Copy User "andemo" as "ergreene"		01/08/2021 12:53
Complete	Copy User "andemo" as "pfconner"		01/08/2021 12:53
Complete	Copy User "andemo" as "copy1"		01/08/2021 12:48

Bulk Changes to Status Types

- Added the ability to filter Status Types by name, making it easier to select multiple Status Types from different regions when updating Status Types in bulk.
- Resolved an issue in which user roles were inadvertently not applied when updating Status Types in bulk.

Internet Explorer

Added a message on the login screen that encourages you to use a browser other than Internet Explorer because, like Microsoft®, Juvare will no longer support Internet Explorer soon.
