

EMResource® 4.2 Release Notes

These notes describe highlights of the EMResource 4.2 release scheduled for Wednesday, May 4, 2022. More information is available through the help in your solution or by contacting the Juvare Support at 877-771-0911 or support@juvare.com.

Jobs List

On the Jobs List, which contains jobs run in the last seven days, you can adjust the display of information by hiding or showing columns and filtering column data, making it easier to find the information you need.

View Headers

On your views, column headers now wrap around, when needed, to fit more columns of data in the available width of a page, improving the presentation of longer names and titles.

Faster Notifications

The speed of event notifications, including emails, text messages, phone calls, and mobile app push notifications, was improved to get notifications out faster.

Resolutions

- An issue that prevented you from smoothly switching between regions after ending an event has been resolved.
- An issue that prevented a small number of accounts from logging in, after being deactivated and then reactivated, has been resolved.
- An issue that prevented some people's custom view from displaying as a map has been resolved.
- When running a Resource Detail report, now even if you do not select a Status Type, the report is generated correctly.
- After ending an event, you are now directed to the Event List as expected.
- Now, when editing a view by applying any of the sort options on the Advanced tab, an issue that prevented resources from displaying properly has been resolved.
- Now, when you change regions while on the Detail View for a resource, the view updates as expected.
- Now, when you click on a resource, you are always taken the Detail View for that resource.
