

EMSupply™ 1.4.4 Release Notes

These notes describe highlights of the EMSupply 1.4.4 release scheduled for Thursday, April 2, 2020. More information is available through your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

Resource Request

Enabled filtering ability by status type. Inventory management can now be filtered by status type, providing accuracy of data and information reporting, which is critical during the current COVID-19 crisis. Additionally, solution functionality is updated to display the Resource Request totals by status types. The totals now display above the Resource Request list. This enhancement is a critical operational function of inventory management and reporting accuracy during the current COVID-19 crisis as well.

Manage Inventory

Improved functionality when working in the Category list. The reduced display time for confirmation, success, and warning (error) messages provides quicker access to data and information and promotes enhanced solution performance.

Idle Lockout Time

Enhanced the idle lockout time when working in the EMSupply solution. The increased lockout time prevents work activity interruptions and promotes work continuity.
