

View and Print a Map

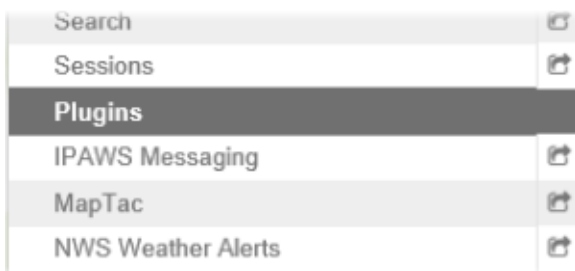

Home > WebEOC > Guide - MapTac and NWS Alerts > View and Print a Map

Print a map from WebEOC's MapTac plugin to have something tangible that you can write on or distribute.

To access and print a map

1. In the *Plugins* section of the control panel menu, click **MapTac**.

2. From MapTac, on the left side panel, click the **Maps** tab.
3. Click the **Maps** drop-down list and select the applicable map/image.

Note: The map or image is re-sized automatically any time you change the size of your window. If you do not want the image to be re-sized, contact your WebEOC administrator.

4. In the lower right corner of the map, click the print icon.
