

Disable or Enable Incident Locations

Home > eICS > Guide - Incident Dashboard > Disable or Enable Incident Locations

Incident locations can be enabled or disabled to indicate whether they appear on the **Map**.

To disable a location

1. On the *Incident Dashboard*, click the **Map** tab. The *Map* page opens.
2. Find the location in the table and on that row, select the check box in the **Disable** column. The location disappears from the map.

To enable a location

1. On the *Incident Dashboard*, click the **Map** tab. The *Map* page opens.
2. Find the location in the table and on that row, clear the check box in the **Disable** column. The location appears on the map.
