

# Change Regions

Home > EMResource > Guide - EMResource Getting Started > Change Regions

If you have access to more than one region, you can quickly change regions at any time.

**Note:** The first page you see when you log in is your default view for the region you were logged in to the last time you used EMResource.

## To change regions

In the main menu, click **My Regions** and then click the name of the region you want to open.
