

# Create an Event

Home > EMResource > Guide - Events > Create an Event

Depending on your permissions, you may be able to create events, including ad hoc and multi-region events. Events are created from templates that include an icon, and ask you to enter specific details.

Springfield, USA (DEMO) Event Event Management

Event Management

Create New Event Create Ad Hoc Event

Action	Icon	Multi?	Status	Start ▲	End	Title
<a href="#">Edit</a>   <a href="#">End</a>		No	Ongoing	2019-04-17 01:38	never	Hosp
<a href="#">Edit</a>   <a href="#">End</a>		No	Ongoing	2019-07-22 11:31	never	Heat
		Yes	Future	2022-08-02 11:04	2022-08-03 11:04	MRE

**Note:** Prior to creating an ad hoc event, you should create the appropriate status types and associate them with the resource types for the event.

After creating an event, if you specified an address, you can open the [Map view](#) to see the event icon at the specified location. Click the icon to view the event details. Alternatively, select the event in the *Event Resources* field to limit the view to only resources associated with that event.

Keep the following in mind about event creation:

- The **Title** and **Information** fields may contain default text that provides a generic description of the event type. You can use the default text or edit to replace it.
- By default, events end 24 hours from the date and time you create them.
- By default, the **Display in Event Banner** check box is selected, and the event will appear in the event bar at the top of EMResource. If you do not want the event displayed in the banner, clear the **Display in Event Banner** check box.
- For certain types of events, especially those created to coordinate and track emergency response, certain address details (**City**, **State**, and **County**) may be required. If they are, two asterisks (\*\*) appear next to the field label.
- In specifying a location, you can enter minimal details (such as city and state) and then look up the address. In the map, click the location icon and drag it to the appropriate spot in the map.

## To create an event

1. In the main menu, click **Event** and then click **Event Management**. The *Event Management* page opens.
2. Click **Create New Event**. The *Select Event Template* page opens.
3. Locate the template you want to use and, on that row, click **Create**. The *Create Event* page opens.
4. Enter this information.

Field	Description
Title	Name of the event.
Information	Additional details about the event.
Event Ends	Date and time the event is scheduled to end automatically. Alternatively, the event can be open-ended with no specified end date and time.
Drill?	When selected, identifies the event as a drill.

- To provide more detail, click **Show more settings**. Additional fields appear.
- Enter this information.

Field	Description
Street Address	Number and name of the street at which the event is located.
City	Name of the city in which the event is located.
State	Abbreviation for the state in which the event is located.
Zip Code	United States Postal ZIP Code in which the event is located.
County	State county or parish in which the event is located.
Latitude /Longitude	Geographic coordinates where the event is located. To obtain the exact <b>Latitude</b> and <b>Longitude</b> , click <b>Look up Address</b> .
Event Start	Start date and time for the event; the default is <b>Immediately</b> . However, you can set a start date in the future (for example, for exercises and training sessions).
Attached File	<p>Attaching a file to the event makes it available to associated users. The following file types can be attached: PDF (.pdf), text (.txt), and web page (.html).</p> <ol style="list-style-type: none"> <li>Click <b>Choose File</b>. Your browser explore window opens.</li> <li>Locate and click the file.</li> <li>Click <b>Open</b>. The <i>Create Event</i> page shows the path and filename for the attachment.</li> </ol>
Display in Event Banner?	When selected, the event will appear in the event banner at the top of every page. This option must be selected for events that do not have resources.
Private?	When selected, the user only sees information for resources with which they are associated.
End Quietly?	When selected, allows you to end the event without sending notifications to participants and other interested parties.
Re-notify	<p>Indicates whether follow-up notifications are sent and if so, what time or how frequently they are sent.</p> <ul style="list-style-type: none"> <li>Disabled. No additional notifications will not be sent automatically.</li> <li>Every <i>n</i> hours, starting (date) at (time). At the specified interval, on the specified date and time, additional notifications will be sent automatically.</li> <li>At specified times. At the specified times, additional notifications will be sent automatically.</li> </ul>

- In the *Resources to Participate in This Event* area, select the checkbox for resources you want to include in this event. The event icon appears next to selected resources in *Views*.

**Note:** All resources associated with the event template are displayed. Selected resources are requested to update their event status types, in addition to their daily status types. Selected resources do not indicate who will receive notifications regarding the event. Refer to [Set Up Template Notifications](#) for more information.

- Click **Start Event**.

## To create an ad hoc event

- In the main menu, click **Event** and then click **Event Management**. The *Event Management* page opens.
- Click **Create Ad Hoc Event**. The *Create Ad Hoc Event* page opens.
- Enter the requested information (see the procedure *Create an Event* above for field descriptions).
- Click **Next**. The *Select Resources* page opens.
- Locate and select the check box for resources you want to include in this event. The event icon will appear next to selected resources in *Views*.

**Note:** All resources associated with the event template are displayed. The resources you select will receive a request to update their event status types (in addition to their daily status types); however, selected resources will not necessarily receive event notifications regarding the event. Refer to [Set Up Template Notifications](#) for more information.

- Click **Next**. The *Select Status Types* page opens.
- Locate and select the check box for status types (associated with the selected resources) that you want to monitor.
- Click **Next**. The *Ad Hoc Event Confirmation* page opens.
- Review the information you entered and when you are ready to create the event, click **Yes**.

## To create a multi-region event

**Note:** Creating a multi-region event may take several minutes to complete.

- In the main menu, click **Event** and then click **Event Management**. The *Event Management* page opens.
- Click **Create New Multi-Region Event**. The *Create Multi-Region Event* page opens.
- Enter the requested information (see the procedure *Create an Event* above for field descriptions).
- Click **Next**. The *Select Resources* page opens.
- In the *Resources to Participate in This Event* area, take one of these actions.

If you want to...	Then...
Include all resources from all participating regions,	Select the <b>Include all resources</b> check box.
Only include some resources from certain regions,	<p>a. Clear the <b>Include all resources</b> check box and for each region, select the appropriate template.</p> <p>b. Click <b>Next</b>. A page opens for every region you selected.</p> <p>c. On each region page, select specific resources and click <b>Next</b>. The confirmation page opens.</p> <p><i><b>Tip:</b> Use the filter and search options to reduce the number of resources and make it easier to identify the appropriate resources.</i></p>

6. Click **Next**. The *Select Status Types* page opens.
7. Locate and select the check box for status types (associated with the selected resources) that you want to monitor.
8. Click **Next**. The *Multi-Region Event Confirmation* page opens.
9. Review the information you entered and when you are ready to create the event, click **Yes**.
