

Share Resources with Other Regions

Home > EMResource > Guide - Regions > Share Resources with Other Regions

With appropriate permissions, you can share information about your region's resources with other regions. This task can also be completed on the individual resource's detail page.

Tip: Use the search fields at the top of the Edit Other Region Security - Resources page to locate the resources you want to select from.

To share resources

1. In the main menu, click **Setup** and then click **Other Regions**. The *Other Region List* opens.
2. Click **Share Resources**. The *Edit Other Region Security - Resources* page opens.
3. Locate the resources you want to share and, on those rows, select the checkbox.
4. Alternatively, for resources you do not want to share, clear the checkbox.
5. Click **Save**.
