

Share Status Types with Other Regions

Home > EMResource > Guide - Regions > Share Status Types with Other Regions

With appropriate permissions, you can share information about your region's status types with other regions. This task can also be completed on the individual status type's detail page.

manage users	Training	down
manage users	yDemo	up down
manage users	Springfield Intensive Psych (DEMO)	up

Tip: Use the search fields at the top of the Edit Other Region Security - Status Types page to locate the status types you want to select from.

To share status types with other regions

1. In the main menu, click **Setup** and then click **Other Regions**. The *Other Region List* opens.
2. Click **Share Status Types**. The *Edit Other Region Security - Status Types* page opens.
3. Locate the status types you want to share and, on those rows, select the checkbox.
4. Alternatively, for status types you do not want to share, clear the checkbox.
5. Click **Save**.
