

Edit Resource-Level Status Types

[Home](#) > [EMResource](#) > [Guide - Resources](#) > [Edit Resource-Level Status Types](#)

A resource inherits status types from its resource type. Authorized users can also add status types to an individual resource.

***Tip:** Use the search fields at the top of the Edit Resource-Level Status Types page to locate the status types you want to select from.*

To edit resource-level status types

1. In the main menu, click **Setup** and then click **Resources**. The *Resource List* page opens.
2. Locate the resource and, on that row, click **Status Types**. The *Edit Resource-Level Status Types* page opens.
3. Select or clear the checkboxes for each status type.
Note: You cannot remove status types that are inherited from the resource type. The checkboxes for these status types are selected and disabled.
4. Click **Save**.
