

Release Notes

Home > WebEOC > Community Resources > Release Notes

Release Notes are PDF documents that cover the new features and enhancements associated with a specific release of WebEOC and/or its add-ons. You can easily print and distribute these documents to members of your organization as appropriate.

Anyone can access the attached product announcements to learn about WebEOC's enhanced system functions. In both the WebEOC Product Announcements and WebEOC Add-on Product Announcements sections, the documents appear in reverse chronological order, with the most recent at the top.

If you have additional questions about a release, would like to view an earlier product announcement that is not listed or want to download the most version of WebEOC contact your [Client Services Manager](#).
