Answer the Security Question

By selecting a security question and saving the answer, you are creating a secure path to access your account in case you forget your password.

If you have not completed the security question and answer previously, the Security Question window appears after every log in. If you have saved your question and answer, you can update your selection through your profile.

To answer the security question

1. If the *Security Question* window is not already open, on the **Settings** tab, click **My Profile**. Your profile
2. Click **Edit Security Question**. The *Security Question* window opens.
3. In the **Question** list, click the question you like best.
4. In the **Answer** list, enter your answer to the question.
5. Click **Save**.
