

Delete a Dashboard

[Home](#) > [EMTrack](#) > [EMTrack Dashboard](#) > Delete a Dashboard

You can delete dashboards that you created. Deleting dashboards does not delete the filter on which they are based.

To delete a dashboard

1. Click the **Dashboard** tab.
2. Choose the appropriate dashboard from **Current Dashboard**.
3. Click **Configure** and select **Delete Dashboard**. A window opens asking you to confirm the deletion.
4. Click **Yes**.
